

# 2009 JAMIS KROMO

Ghost Blue

## FEATURES/BENEFITS

What's Kromo? A burly 4130 chromo-framed, 26" wheeled, front-suspended DJ/Urban bike with a single cog FW that just happens to be disc brake and derailleur compatible

We lowered stand-over on the '09 Kromo by moving the seat clamp below the seat tube/top tube joint, intergrating it right into the seat tube (whoa!) making the frame lighter, stiffer & more compact

SR's Duro DJ-D fork offers beefy 30mm stanchions, lightweight magnesium lowers and hydraulic rebound damping, all with a custom Jamis-only (now everybody else will want it) color scheme

Kenda's K-Rad checkerboard-shaped knobs stick to dirt and asphalt with ease for complete control and traction with ribbing between the knobs to strengthen the casing

We outfit the Hayes Stroker Ryde's rear brake with a micro-140mm rotor which stops great while keeping the weight down, then we bolt a full-size 160mm rotor on the front for stoppies

The multi-geared, cassette-ready rear hub allows this bike to be turned into a fully geared mountain bike quick and easy without the cost of a new rear wheel.

The Syncros FR stem and Bulk bar are designed for hardcore use. Example: the stem actually cradles the handlebar in body of the stem, not on the 4 bolts.

Crank Bros 5050 platform pedals feature a light-but-strong 6061 alloy body with removeable/replaceable end plates for color customization and pedal spikes for a confident & secure grip

The Alienation Pivotal post/saddle assembly has no rails to bend. The saddle rests directly on the post. Adjustment is a snap. There's just one single bolt to turn, accessed through a port in the saddle top

The aptly named Mr Hand grips from Alienation are super tacky but leave no messy trace of just how tacky they are. Just like the Bermuda Triangle

And while the Alienation commercial is still rolling, how 'bout those baby-poop brown Black Sheep rims? Yep, they're double-walled for strength, with an I-Beam right down the center of the rim for increased torsional rigidity, huge 6mm pins for a stronger rim joint (that require bigger pin-seat holes, hence a lighter rim) and shorter bead hooks for improved tire seating. Who are these guys?

## UPGRADES FROM 2008

Frame upgraded to include integrated seat clamp below the top tube/seat tube joint

Alienation Black Sheep rims and Kenda K-Rad tires

Cassette rear freehub with Relic 9:1 14T freewheel

New Alienation Recliner saddle

Alienation Mr. Hand grips

Alienation Pivotal seat post

Hayes Stroker Ryde hydraulic disc brake with 140mm rear and 160 mm front rotor

## REASONS TO RIDE KROMO

You want to be like Jordie Lunn

You like to dirt jump and ride skate parks

It's derailleur compatible

It's blue with baby-poop brown rims

## SPECIFICATIONS

Frame	4130 Chromo Dirt Jump Frame, integrated M5 seat post clamp positioned below top tube/seat tube joint, horizontal dropouts
Fork	SR Duro Dirt Jump, coil spring/hydraulic damping, magnesium sliders, 100mm travel
Headset	Aheadset, external cups, 20mm shim stack, 1 1/8"
Wheels	Alienation Black Sheep rims, 6mm pins, 32H, Formula alloy disc hubs, sealed bearing rear, WTB 14g stainless steel spokes
Tires	Kenda K-Rad, 26 x 2.3"
Derailleurs	N/A but derailleur hanger included
Shiftlevers	N/A
Chain	KMC Z410
Cassette	Relic 9:1 cog spacer with 14T cog
Crankset	4130 Chromoly crank, 28t chainring, 175mm
BB Set	4130 Chromo spindle for 3-pc crankset
Pedals	Crank Bros 5050 platforms
Brakeset	Hayes Stroker Ryde hydraulic disc brakes, V6 front & V5.5 rear rotors
Handlebar	Syncros FR38 6061, 31.8 O° x 9/4° sweep x 38mm rise x 710mm
Stem	Syncros FR50, 3D forged 6061, 31.8 bar bore x 15° rise x 50mm
Grips	Alienation Mr. Hand with 14mm end caps
Seat Post	Alienation Billy Club Pivotal, 25.4 x 242mm
Saddle	Alienation Recliner, SL cover, corduroy strip, ABR corners
Sizes	Medium & Large
Color	Ghost Blue
Weight	32.20 lbs
