MOUNTAIN BIKE'S
BEST OF 2007

JAMIS DAKAR XAM 1.0

For less than two grand the Jamis Dakar XAM 1.0 gives you more than 5 inches of highly desirable FOX suspension at both ends. This bike's great parts spec endows it with a level of performance that belies the price. Combined with a capable rear-suspension design and well-balanced geometry, the Dakar XAM 1.0 will have you rocking technical trails with confidence or flowing down less technical singletrack like butter on hot toast. It's not the fastest climber but it's not supposed to be—this is a fun and versatile bike without a big-sticker hangover. **INFO: jamisbikes.com**
