

2009 JAMIS BEATNIK

UPGRADES FROM 2008

New model for 2009

Graphite

FEATURES/BENEFITS

Reynolds 520 double-butted chromoly frame for the smooth, shock-damping, resilient-but stiff ride urbanites demand, with a full complement of brazed-on rack and fender mounts

The Beatnik frame features Size Specific Tubing (SST): smaller frames are constructed with smaller diameter tubing to retain resiliency and ride quality, while larger frames are constructed using larger diameter tubing to retain stiffness for larger riders

Our new lugged, full chromoly fork offers classic looks and steel's legendary feel & durability

We designed the Beatnik's stoker bar to offer multiple flat and forward hand positions without drops to reduce hand & back fatigue while optimizing in-traffic visibility

Alex double-wall aluminum rims assure strength and durability in tough urban environments, with stainless spokes for strength & longevity with a Formula alloy, sealed flip-flop reversible rear hub offering both single-fixed gear and single-speed freewheel depending upon rider preference

FSA's forged FSA Vero crank with 46t single chainring and traditional square taper BB interface are durable and easy to maintain

Selle San Marco's Ischia saddle rides comfortably & efficiently, with classic Italian styling

Tektro's dual pivot brakes may seem superfluous to the most staunch urban riders, but they are no less superfluous than a helmet. They add a measure of safety that is: Priceless

Vittoria Zaffiro 25c tires hold just enough air volume to make for a comfortable & stable ride, yet are narrow enough to roll nearly as fast as 23c road bike tires
