

2009 JAMIS STARLITE 20

Sugar Pink

Pearl White/Ocean Mist

UPGRADES FROM 2008

The global realities of 2009 delivered some significant price increases due to the price of oil, weaker US dollar, higher foreign labor costs, demand for steel, you name it

We could have opted to down-grade Starlite to preserve a price point, but we feel our kids deserve and need a decent first bike that's built to deliver smiles, safely & securely

FEATURES/BENEFITS

Our lightweight & durable 7005 aluminum Starlite frame is easier to pedal than steel

Starlite's swooping frame design has a purpose other than great looks: with 20" wheels this bike offers a low standover and low center of gravity for stable, secure riding and control

We've even increased the wheelbase length over our 20" Laser to offer even greater stability, security and comfort

Those attractively painted fenders keep the rain & mud off the bike & the rider and look cute to boot

Our wheels are light and easy to pedal thank to lightweight alloy rims that are silver anodized for extra corrosion resistance

We build the Starlite wheels with 36 spokes in a 3-cross lacing pattern for a strong & durable wheel

Starlite's extra-plush, broad-based saddle features a suede-like brushed vinyl top that's grippy and keeps young riders from sliding around unsafely on the saddle top

Our soft and comfortable foam grips feature a smooth vinyl cover that is embossed and stitched to match the saddle & decal theme

The Starlite's full-length & full ring-wrap chainguard keep clothes & legs cleanly and safely out of the way of the chain

Our pedals offer a non-slip insert that keeps feet and shoes in full contact even when wet for safe & secure pedaling

Those wide Brooklyn Speedway tires offer a large contact patch for greater stability, with a smooth tread surface for easy rolling, and hold plenty of air volume for a more comfortable ride

Starlite's swept back handlebars aren't boys BMX bars painted a feminine color: they are specifically designed to be easy to reach and promote a comfortable, secure upright ride position

If a steel or alloy part is not painted or anodized, we protect it with a black electro-plating which enhances the corrosion resistance of that part. Black may not be the most traditional or obvious parts color choice for a girl's bike, but the black electro-plating finish won't scratch & flake as easily as white paint can, and the black parts just look more expensive & hip and less Wal-Mart

Every Starlite offers a kickstand for parking that pride & joy up securely, and a safety bell to announce that she has arrived

SPECIFICATIONS

Frame	Comfort frame design with full-wrap chainguard, fenders and training wheels
Fork	Hi-tensile carbon steel unicrown
Headset	Standard threaded type, 22.2mm
Wheels	Alloy 36H rims with steel front and Hi-Stop coaster brake rear hubs, 14G nickel-plated spokes
Tires	Brooklyn Speedway, 20" x 2.125", black with whitewalls
Derailleurs	N/A
Shiftlevers	N/A
Chain	KMC Z410
Cassette	N/A
Crankset	Cold-forged steel, electro-plated black finish, 5 1/2" arms, 36T chainring
BB Set	OPC bearing type, VP-B35
Pedals	Comfort style platform pedal with non-slip TPE insert
Brakeset	Alloy linear pull type and Hi-Stop coaster brake (both rear only) with alloy lever
Handlebar	Swept-back comfort design, electro-plated black finish, with safety bell
Stem	Alloy with front facing removable cap, 40mm extension x 130mm quill
Grips	Embossed & stitched vinyl cover over comfort foam
Seat Post	Pillar, electro-plated black finish, 27.2 x 250mm, with 31.8mm alloy clamp
Saddle	Jamis Comfort, super-soft brushed vinyl cover with single loop springs
Sizes	10"
Color	Pearl White/Ocean Mist or Sugar Pink
Weight	24.80 lbs
