

2009 JAMIS X.20

UPGRADES FROM 2008

Available in a gender-neutral color option

XC saddle

Ghost Blue/Pearl White

Team Red/Pearl White

FEATURES/BENEFITS

Our lightweight & durable 7005 aluminum X-20 frame is easier to pedal than steel

The tubing is not just round; it has been tapered & ovalized to optimize frame strength and durability while offering the cool looks today's young riders demand

Compared to bigger 24" wheeled bikes, the smaller diameter 20" wheels and short 10" frame of the X-20 provides more standover clearance and a lower center of gravity for enhanced control & safety, so young aspiring mountain bikers can learn to ride both on road and off comfortably, securely and safely

That suspension fork isn't just for cool looks: it's 40mm of bump-eating, telescoping travel means greater control & safety for young riders

There's a steel cage, protective derailleur guard attached to the rear of the frame to protect the rear derailleur from knocks, keeping it in adjustment longer for greater safety & control

A six-speed drivetrain is enough for any youngster to learn how to shift and master. It's also enough gearing to get around the neighborhood or park comfortably

Which is why we spec just one single chainring in front: to simplify shifting. We top it off with a double-sided chainguard to keep the chain in place and clothes & legs out of the chain's way

A full alloy parts package -- including seat post, threadless stem, crankarms, seat post clamp, brakes & rims -- reduces total bike weight and adds value

The X-20's XC saddle offers lots of high quality padding for comfort and control, with a narrow nose so that legs can pedal freely without chafing

SRAM's MRX twist shifters and Shimano rear derailleur are kid friendly & easy to shift

We've spec'ed nut type, non-quick release hubs and seat post clamps, so that wheels and seats remain securely and safely attached to the frame and fork

Easton's EA90 cockpit is their lightest cockpit for performance, lightweight and security in the all important contact points

SPECIFICATIONS

Frame	Enduro frame design, 7005 aluminum tubes, tapered/ovalized top tube, down tube & stays
Fork	Suspension fork with coil spring, 40mm travel
Headset	Aheadset, 1 1/8"
Wheels	Alloy 36H black anodized rims with brushed brake tracks, heavy duty ATB hubs with nutted axles and 14G nickel-plated spokes
Tires	CST ATB, 20 x 1.95", blackwall
Derailleurs	Shimano TX30 short cage rear with protective guard
Shiftlevers	SRAM MRX Grip Shift, 6-speed
Chain	KMC HP20, 1/2 x 3/32
Cassette	Indexed, 6-speed, 14-28T
Crankset	Forged alloy crank, 152mm, with 36T chainring and protective double-sided chainguard
BB Set	Cotterless type, 3PB axle, 68 x 119mm (32 - 52 - 35)
Pedals	ATB style, hi-impact resin, toe-clip attachable
Brakeset	Alloy linear pull type with full alloy short reach levers
Handlebar	ATB tapered 6" sweep x 13mm rise x 560mm wide
Stem	Jamis threadless, 10D rise x 60mm extension
Grips	Kraton for Grip Shift
Seat Post	Alloy pillar, 27.2 x 300mm, with 31.8mm alloy clamp
Saddle	XC ATB style
Sizes	10"
Color	Ghost Blue/Pearl White or Team Red/Pearl White
Weight	25.00 lbs
