Sunset Red

FEATURES/BENEFITS

The Boss Cruiser's lightweight & durable 7005 aluminum is easier to pedal than steel, and offers corrosion and rust-resistant attributes in coastal salt water conditions.

Our sloping double diamond frame design offers the lightest possible frame weight, with 6 sizes assuring the best possible customer fit for the most comfortable & secure ride.

The large diameter single-loop stays with trailing dropout are a Boss signature trademark, having been part of the original Boss design back in 1980.

The near constant diameter stays look great and offer a longer wheelbase for a more stable & comfortable ride.

Alex's Zuma alloy rims are reliably true & durable and are laced with 36 stainless steel spokes on the Boss producing a strong, rust-resistant wheel.

The Boss features a near all-alloy parts list -- alloy micro-adjust seat post, alloy stem, alloy seat post clamp, alloy front hub, alloy rims, alloy kickstand -- all of which add value, eliminate rust and reduce weight for an easier to pedal, more comfortable ride.

Our Boss saddle is as plush as it gets -- quilted top, wide body, fully stuffed, double loop springs -- with Male & Female specific saddle lengths & widths.

Our Jamis Cruiser bar is the most sensibly designed in the business -- just the right width, sweep & rise, for a perfectly comfortable upright ride that won't accidentally knock you in the ribs during tight radius, slow speed turns like in a driveway or parking lot.

The rubber-like inserts on the pedals are actually slip-resistant, offering some shock-absorption as well, for a safer, more secure ride. You can even ride barefoot comfortably!
