

2010 CAPRI 20"

UPGRADES/CHANGES FROM 2009

Shimano Revo-Shift SL-RS35 shifter

Ocean Mist

FEATURES/BENEFITS

Our lightweight & durable 7005 aluminum Capri frame is easier to pedal than steel.

Capri's swooping frame design has a purpose other than great looks: with 20" wheels this bike offers a low standover and low center of gravity for stable, secure riding and control.

We've even increased the wheelbase length over our X20 20" mountain bike to offer even greater stability, security and comfort for young riders.

Those attractively painted fenders keep the rain & mud off the bike & the rider and look cute to boot.

A six-speed drivetrain is enough for any girl to learn how to shift and master. It's also enough gearing to get around the neighborhood comfortably.

Which is why we spec just one single chainring in front: to simplify shifting. We top it off with a full-wrap chainguard to keep the chain in place and clothes & legs out of the chain's way.

Capri's extra-plush, broad-based saddle features a suede-like brushed vinyl top that's grippy and keeps young riders from sliding around unsafely on the saddle top.

Our soft and comfortable foam grips feature a smooth vinyl cover that is embossed and stitched to match the saddle & decal theme.

Shimano's Revo-Shift twist shifters and TX31 rear derailleur are kid friendly & easy to shift.

A 60 degree hi-rise stem with 90mm extension and 150mm extra-long quill offers plenty of up or down adjustment range to put those up-swept riser bars in just the right position.

Our pedals offer a non-slip insert that keeps feet and shoes in full contact even when wet for safe & secure pedaling.

Those wide Brooklyn Speedway tires offer a large contact patch for greater stability, with a smooth tread surface for easy rolling, and hold plenty of air volume for a more comfortable ride.

Every Capri comes equipped with a kickstand so parking in the driveway or sidewalk doesn't result in gouges or scratches and an unhappy new bike owner.

SPECIFICATIONS

Frame	Lightweight aluminum comfort frame design with full-length chainguard, fenders and kickstand
Fork	Comfort unicrown, oversized, with radiused blades
Headset	Standard threaded type, 1 1/8"
Wheels	Alloy 36H rims with small flange nudded hubs and 14G nickel-plated spokes
