## FEATURES/BENEFITS

Large diameter 700c road bike wheels roll faster & more predictably at speed and roll over bumps & potholes more comfortably than smaller diameter 26" wheels.

Citizen's lightweight & durable aluminum frame offers hydroformed top and down tubes & bullet style cable guides for good looks and increased strength.

The sloping double-diamond frame design in 7 sizes assures the best possible customer fit for more comfort, better handling and increased safety.

RST's Neon Pro suspension fork offers over 2" (60mm)" of coil sprung/MCU travel with external preload adjustment and lightweight alloy crown and sliders.

Smooth-rolling, Vittoria Adventure Touring 700 x 35c tires actually have the same air volume and width of a 37mm tire and are more comfortable to ride than smaller width 23 - 28C road tires. These tires also feature a reflective sidewall stripe for enhanced visibility in the dark.

Weinmann's ZAC1800 double wall rims are stronger, lighter and longer lasting than standard single wall rims.

Shimano's EZ-Fire Plus shifters and Acera rear derailleur shift intuitively, smoothly and reliably.

The Shimano 48/38/28 crankset & 11-32 cassette provide a huge range of 24-speeds for smooth and easy pedaling on any terrain.

The sealed cartridge bottom bracket & sealed headset improve performance and reduce maintenance.

Our super plush saddle features memory foam padding for optimum support with maximum comfort. The slip-resistant suede-type top prevents sliding and the burnished side panels reduce leg friction while pedaling. Elastomer springs help soak up high resonant vibrations.

Our new dual-density grip delivers comfort and a secure non-slip steering interface between rider and handlebar.

Our telescoping suspension seat post with 1" of coil-sprung travel smooths out the road and trail.

The long quilled, angle-adjustable stem and 3" rise handlebars offer a comfortable, upright ride position that's easy on neck & wrists.
