TOP 5 THINGS YOU NEED TO KNOW

The FOX FLOAT suspension fork features rebound adjust and 3-position damping for unprecedented performance in all types of terrain. It's intuitive to use and can be activated while riding.

WTB KOM TCS tubeless rims are as light as carbon and showcase what is possible with WT69 alloy. A UST-compliant inner rim profile provides standards-driven consistency while a tape and sealant system eliminates precious rotational weight.

Shimano's XT Shadow Plus rear derailleur features an on/off chain stabilizer system that reduces chain slap and is lighter and more efficient than a roller type chain device.

KS Suspension's eTen dropper seatpost is a revelation in value priced performance. Based on an air spring, hydraulically locked cartridge system, the eTen has features that surpass rival posts at twice the price.

Ritchey's Trail series stem and bars are specifically designed for today's trail bikes and pack a dramatic increase in stiffness and strength over competitor's designs.
