TOP 5 THINGS YOU NEED TO KNOW

The Dragonslayer frame features rear carrier rack eyelets, 2x and singlespeed capability, full length cable housing, 100mm of rear tire clearance and three water bottle mounts including a 3-hole pattern for attaching larger cargo style cages for lightweight gear to conquer any off-road adventures.

Vittoria's 27.5x3" Bomboloni TNT tires provide low inflating pressures, higher stability when cornering, lower rolling resistance and virtually no pinch flats. Tire beads firmly lock on rim edges for easy inflation with a standard pump.

The FOX FLOAT suspension fork features rebound adjust and 3-position damping for unprecedented performance in all types of terrain. It's intuitive to use and can be activated while riding.

WTB Scrapper i45 TCS tubeless rims showcase what is possible with WT69 alloy. A UST-compliant inner rim profile provides standards-driven consistency while a tape and sealant system eliminates precious rotational weight.

Ritchey's Trail series stem and bars are specifically designed for today's trail bikes and pack a dramatic increase in stiffness and strength over competitor's designs.
