## BUILDING ON SUCCESS

Designing bikes is a lot like getting in shape. There's no such thing as absolute perfection, but that's what you strive for. You chase it, you work for it, and sometimes you have a near-perfect ride, which leads to others. You manage to link a few of those together, and suddenly you're riding at a whole new level. You're fit, you're fast, and cycling—something you do for love, for fun—is now a *lot* of fun.

As bike designers, we're having a string of near-perfect years. We broke into Bicycling magazine's coveted 2005 Editor's Choice ranks—not once, but twice—with our Dakar XLT for Best Value Full-suspension Mountain Bike, and with the Quest taking the Best Value Road Bike honors. On top of that critical success, last year's all-carbon Xenith road bikes and 20<sup>th</sup> anniversary Dakar mountain bikes were tremendous hits, and the Eclipse carbon-and-steel road bike set a new performance benchmark by combining carbon's lightness with steel's unmatched ride and responsiveness. It was, by anyone's standards, an incredible year. And we've just upped the ante.

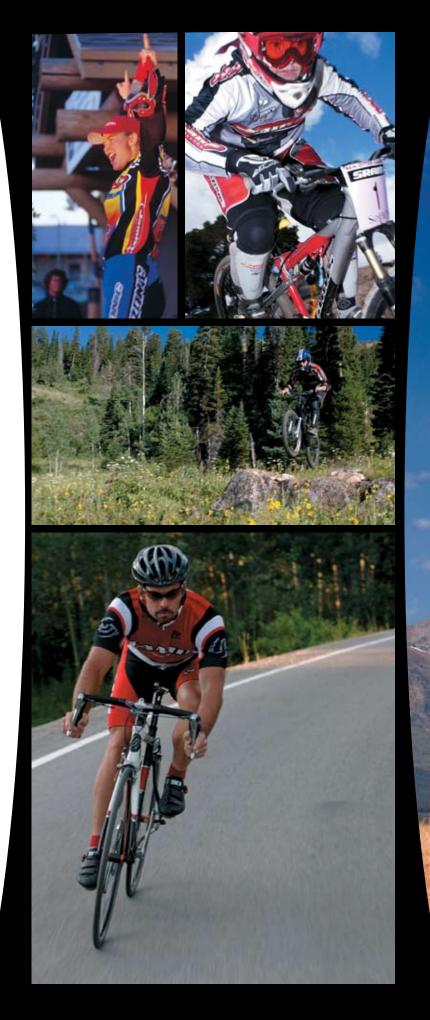

We're hitting the trails with a brace of new mountain bikes, spearheaded by the Diablo, a big-hit rig for downhill bombers and all-mountain adventurers. Last year's Dragon Team gets a younger sibling, the steel-chassis Dragon Pro hardtail. The Dakota series gets a supple, responsive new aluminum/carbon chassis. And we toe the start line with our first-ever factory singlespeed, the Exile Single Speed.

On the pavement, we're building on the success of last year's Xenith series with the all-new, all-carbon Xenith Comp. The Shimano 105-equipped Ventura Elite is the new flagship for our Ventura series. And we're launching two exciting women's models, with the Reynolds air-hardened steel Quest and aluminumframe Ventura Comp both featuring women's specific frame geometry with anatomically appropriate parts. Plus there's the new Comet triathlon/time-trial bike, and the Sputnik fixed-gear roadie.

And we didn't forget enhancements for our Coda series of flat-handlebar road bikes, cycling's version of luxury sports cars. With Coda, we're introducing our most affordable street performance bike ever, while at the other end of the spectrum there's the new carbon fiber/steel blended Coda Supreme, easily one of the most beautifully crafted and lightest city bikes the industry has to offer.

Along with these new models, we've completely overhauled our graphics across the board. New, exciting colors glisten beneath our trademark Ano Matte finish, a special blend matte clearcoat that's tough as nails, but with a silky sheen.

We're thrilled with our momentum, and the great springboard it gives us for our 2006 lineup. It's not just that these are the best bikes we've ever built. They're the best, the most capable, and the most fun. And that's what riding is all about.

Frand Teton National Park - Jackson Hole, Wyoming

# ROAD BIKES

There is, arguably, nothing more evolved and purpose-built than the road bike. It's the ultimate engineering statement.

Last year's Jamis road lineup was a home run, captained by the all-carbon Xenith with its precisely engineered carbon tubes and beautifully sculpted, structurally perfect carbon lugs. Riders from Team McGuire, VMG/Aerospace and Mengoni raced, and won, on Xenith Team & Pro frames, with many of the riders declaring that these new frames were the best performing, most comfortable they have ever ridden. In fact, the success of our Xenith platform becomes the geometry template used for our aluminum-framed Ventura series in '06, a magic-carpet geo that smoothes asphalt, turns every milliwatt of pedal input to velocity and handles with the crispness of a newly minted hundred-dollar bill.

But this wasn't and isn't our only success story. We turned a lot of high-tech fans on to the "lost" wonders of steel, and a lot of steel holdouts on to the magic of carbon fiber, with the Eclipse and its beautifully blended Reynolds 853 steel/high-modulus carbon fiber chassis. We couldn't build these fast enough, and this year even more riders will get to experience the dramatic performance of a carbon-light frame that sprints and rides like a classic steel chassis. With a carbon super-structure capping a Reynolds 853 steel downtube and chainstays, the lightweight Eclipse dishes out blazing sprinting and climbing efficiency with steel's trademark ride and sensitive road feel.

New road offerings this year include women's versions of our standout Quest and Ventura Comp models, with Reynolds 631 air-hardened steel and Superlight triple-butted aluminum frames; the new Comet for aspiring triathletes and time trialists; and the Sputnik fixed-gear for urban road warriors and winter training junkies. And we're still banging out some of the best specialty bikes in the business with the cyclocross-inspired Nova, the touring-ready Aurora, and the comfort-biased Satellite.

Whether you're looking for a weekend racer, a do-anything pavement scorcher, a fixed-gear specialist, or a long-haul tourer, there's a Jamis road bike that speaks your language, and mirrors your asphalt soul.

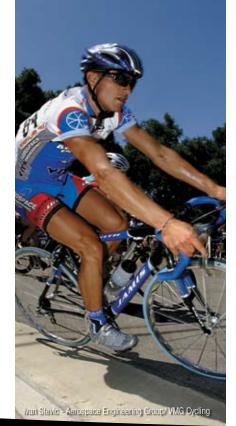

### XENITH TEAM

The Xenith is a hyper-modern design: a full, high-modulus carbon fiber frame with sloping top tube and aggressive geometry. Our carbon-lugged main triangle harnesses your power, while the shape and lay-up of our chain and seatstays yield a supple ride without compromising drivetrain efficiency. We upgraded the wheel spec this year, with Mavic's lightest Ksyrium wheelset ever – the new, Helium inspired, ES wheels. An all-carbon fork (complete with carbon dropouts) blends lightness with sensitivity and control. In Team trim, we bolt on Shimano's full Dura-Ace group with an Easton carbon bar and seatpost, lightweight EA70 stem and Fizik Arione saddle that provide all-day comfort with the precision feel you need for criterium-style corners and fast descents. This is a no-excuses, pull-out-the-stops racer for the die-hard roadie lurking in all of us.

Frame Full carbon fiber frame including lugs, sloping top tube design. Carbon fork with carbon crown, Fork carbon steerer & carbon dropouts. Mavic Ksyrium ES wheelset. Wheels Tires Hutchinson Fusion Comp, folding, 23C. Drivetrain Shimano Dura-Ace derailleurs, Dura-Ace STI levers, Dura-Ace crankset with external BB. Cockpit Easton EC90 carbon fiber bars, EA70 stem, Easton EC70 carbon fiber seat post, Fizik Airone saddle. Brakeset Shimano Dura-Ace dual pivot calipers with Dura-Ace levers.

### XENITH PRO

An Ultegra groupset and Easton alloy control center on the Xenith's all-carbon chassis makes this the best bang-for-the-buck road bike you'll find anywhere. Mavic Ksyrium Elites keep that all-important rotating weight to a minimum, with snappy acceleration and grippy Hutchinson Fusion Comp rubber. Whether you race, head out for solo training missions, or live to dust your pals on the Saturday ride, the Xenith Pro will get you there with all the speed you can muster.

- Frame Full carbon fiber frame including lugs, sloping top tube design.
- Fork Carbon fork with carbon crown, carbon steerer & aluminum dropouts.
- Wheels Mavic Ksyrium Elite wheelset.
- Tires Hutchinson Fusion Comp, folding, 23C.
- Drivetrain Shimano Ultegra derailleurs, Ultegra STI levers, TruVativ Rouleur crankset with Giga X BB.
- Easton EA70 handlebars, EA70 stem, Easton EA70 seat post, Fizik Airone saddle. Cockpit
- Brakeset Shimano Ultegra dual pivot calipers with Ultegra levers.

### XENITH COMP

Shimano's new 10-speed 105 drivetrain may give the Xenith Comp a low-key appearance, but there's no hiding the sleek carbon chassis or the dazzling brilliance of the Xenith's razor-keen handling and snappy road feel. It's the perfect showcase for Shimano's latest 10-speed component group. Stand on the cranks and you'll feel reassuringly solid torsional stiffness and ruthlessly efficient power transfer. For a go-fast-now chassis with limitless upgrade potential, this is the bike to beat.

Frame	Full carbon fiber frame including lugs,	
	sloping top tube design.	
Fork	Carbon fork with carbon crown,	
	carbon steerer & aluminum dropouts.	
Wheels	Mavic Ksyrium Aksium wheelset.	
Tires	Hutchinson Quartz, folding, 23C.

	Easton seat post, Fizik Pave saddle.	
Brakeset	Tektro 423AG dual pivot alloy calipers	
	with 105 levers.	

Sizes: 48, 51, 54, 56, 58, 61cm Color: Natural Carbon/Matte Sky Blue | Weight: 17.75 lbs.

Color: Natural Carbon/ Ano Black | Weight: 17.75 lbs.

### **VENTURA ELITE**

The Ventura Elite takes the prize for pure value and race-ready performance, especially since we've sharpened the geometry to emulate the Xenith's superb road manners, and added Shimano's latest 10-speed drivetrain to the mix. A Kinesis Superlight triple-butted aluminum main triangle and carbon seatstays make for superb sprinting and out-of-the-saddle climbing, with a smooth ride that takes the sting from hard bumps and helps keep those Hutchinson Quartz tires planted. Lightweight and fast, this is what a road racer ought to be.

Frame Kinesis Superlight 7005 triple butted aluminum main tubes with carbon fiber seatstays. Carbon fiber straight blade, aluminum steerer Fork Wheels Shimano R500 wheelset. Hutchinson Quartz, 23C. Tires Drivetrain Shimano 105 10-speed derailleurs, 105 STI levers, TruVativ Touro Compact crankset with PowerSpline BB. Cockpit Easton Road alloy bar, Easton Road forged allov stem. Easton Road seat post. Fizik Pave saddle. Brakeset Tektro 423AG dual pivot alloy calipers with 105 levers.

### VENTURA SPORT

This is our serious, back-to-basics road bike, and our most affordable aluminum frame road bike, ever (which is really saying something, since we're famous for value). Aluminum seatstays save a lot of money in exchange for just a couple ounces, a worthwhile trade that preserves the Ventura's well-tested geometry and handling demeanor. This is a fast, comfortable partner for quick road adventures and the occasional century.

Kinesis 7005 double butted aluminum Frame main tubes with alloy seatstays. Carbon fiber straight blade, aluminum steere Fork Wheels Alex AKX R1.0 wheelset, aero profile rims, 28H front, 32H rear, stainless steel spokes Hutchinson Flash. 23C. Tires Drivetrain Shimano Sora derailleurs. Sora STI levers, TruVativ Touro Compact crankset with sealed cartridge BB. Cockpit Easton Road alloy bar, Easton Road forged alloy stem, Easton Road seat post, Jamis Road saddle. Brakeset Tektro 510A dual pivot calipers with Sora levers.

Sizes: 48, 51, 54, 56, 58, 61cm Color: Ano Black | Weight: 21.75 lbs.

ENTURA

### VENTURA COMP

The '05 Ventura Comp was so popular, we launched an up-spec Elite version and also spawned a women's version this year with geometry and parts spec'd to accommodate their unique morphology. The Tiagra drivetrain and TruVativ Touro Compact crank let you experience Shimano's famously quick, light-touch shift action, and the hill-taming gearing of a compact crank. With a new carbon seatstay VENTURA that helps damp road buzz, this is the ideal bike for centuries and fair-weather riders, a stable ride with good handling and friendly gearing. Kinesis 7005 double butted aluminum main tubes with carbon fiber seatstays. Carbon fiber straight blade, aluminum steer Wheels Formula XR5 wheelset. Hutchinson Flash, 23C. Tiagra STI levers, TruVativ Touro Compact crankset with PowerSpline BB. alloy stem, Easton Road seat post, Jamis Road saddle. with Tiagra levers. Sizes: 48, 51, 54, 56, 58, 61cm

Frame Fork Tires Drivetrain Shimano Tiagra derailleurs, Cockpit Easton Road alloy bar, Easton Road forged Brakeset Tektro 510A dual pivot calipers

Color: Ano Black | Weight: 20.50 lbs.

Color: Ano White/Ano Baby Doll Blue | Weight: 20.50 lbs.

### TRILOGY

It takes more to make a good time trial bike than a frame made from aero tubes. The all-new Trilogy uses tried-and-true TT geometry that promotes an aerodynamically aggressive riding position and a biomechanically optimized posture that helps you generate steady power over the long haul. Dura-Ace bar-end shifters and Ultegra derailleurs ensure reliability when you're exploiting the aero advantage of the Mavic Cosmic Elite wheels, and a Syntace cockpit provides comfort and control in the aero position. Go fast. Get aero.

- Frame Super Aero 7005 frame with airfoil shaped tubes, wheel cut-out, rear entry dropouts.
- Fork Easton EC90 Aero all carbon fork.
- Wheels Mavic Cosmic Elite wheelset.
- Tires Hutchinson Fusion Comp, folding, 23C.
- Drivetrain Shimano Ultegra derailleurs, Dura-Ace bar end shiftlevers, TruVativ Elita 53/39 crankset with Giga-X BB.
- Cockpit Stratos Zero bars with C2 Clip & F99/260 stem, carbon fiber post, Fizik Airone Tri saddle.
- Brakeset Shimano 105 calipers with extension levers.

Same aggressively aero frame as the Trilogy, with a tightly contoured rear wheel cutout in the aero seat tube, sleek airfoil tubing and a Syntace control center. Shimano's 105 derailleurs and an Alex wheelset trim some financial drag from the budget without exacting much of a speed penalty. If you're a budding triathlete, or simply want a more serious time trial bike than your everyday road rig, the Comet will step you up a level or two in performance.

Color: Radium Blue/Pearl White | Weight: 20.00 lbs.

Frame	All Aero 7005 frame with airfoil shaped tubes, wheel cut-out, rear entry dropouts.
Fork	Carbon aero fork, carbon blade, alloy crown.
Wheels	Alex ALX-320DX aero wheelset.
Tires	Hutchinson Quartz, 23C.
Drivetrain	Shimano 105 derailleurs, Dura-Ace bar end shiftlevers, TruVativ Elita 53/39 with Giga-X BB.
Cockpit	Stratos Zero bars with C2 Clip & F99/260 stem, carbon fiber post, Fizik Pave saddle.
Brakeset	Tektro 423A calipers with RX 4.1 extension levers.

### ECLIPSE

With its Reynolds 853 down tube and heat-treated chrome-moly chainstays, the Eclipse rides and feels like a classic steel bike. But the carbon-fiber top tube, seat tube and seatstays give it a lightweight heft no all-steel bike can match. It does the impossible-improving on steel's legendary ride. We've moved up to Campagnolo Centaur derailleurs and brakes this year, and dropped the price! Campy Ergopower levers and a TruVativ Rouleur carbon crank make the Eclipse a modern race-ready bike, but with old school feel.

Frame	Carbon fiber top tube, seat tube & seatstays	
	with Reynolds 853 down tube	
	and heat-treated cromo chainstays.	
Fork	Easton EC70 carbon fork	
Wheels	Mavic Ksyrium Equippe wheelset.

	Easton EC70 carbon seat post,	
	Fizik Airone saddle.	
Brakeset	Campagnolo Centaur dual pivot calipers	
	with Centaur levers.	

### QUEST

The Quest is a sweetheart, the one that ran away with Bicycling's 2005 Editor's Choice award for Best Value Road Bike. And it's no wonder, with a Reynolds 631 air-hardened steel chassis and a hardworking Shimano 105 drivetrain, powerful Tektro dual-pivot brakes and lightweight alloy handlebar, stem and seatpost from Easton. We adjusted the geometry a little by raising the handlebar height, for more comfort, and extended the range this with a women's model that takes female morphology into account for a superb fit and the right weight distribution for stability and good cornering manners.

- Reynolds 631 air-hardened chromoly main tubes with heat treated-taper gauge cromo stays. Frame
- Fork Easton EC70 carbon fork
- Mavic Ksyrium Aksium or Easton-Velomax Vista wheelset. Wheels
- Tires Hutchinson Quartz, folding, 23C.
- Drivetrain Shimano 105 10-speed derailleurs, 105 STI levers, TruVativ Elita Compact crankset with Giga-X BB.
- Cockpit Easton EA50 bars, EA50 stem, Easton Road seat post, Fizik Pave saddle.
- Brakeset Tektro 423AG dual pivot calipers with 105 levers.

	with in-line safety levers and Sora drop levers.	

Color: Platinum/Gloss Black | Weight: 23.75 lbs.

### NOVA

A Reynolds 631 chrome-moly steel main triangle and taper-gauge chrome-moly steel stays give the Nova just the right blend of stiffness and ride to make it sing over rough pavement. That's no coincidence, since the Nova's cantilever brakes and chunky 32mm tires mark it as a cyclocross bike, a road bike-turned-dirt machine. Ritchey aero wheels and the new Shimano 105 10-speed drivetrain keep things fast on the pavement. The Avid Shorty 4 cantis are road lever-compatible and the compact-chainring crank, burly Giga-X bottom bracket, powerful brakes and rackand fender braze-ons make it an ideal loaded touring bike or foul-weather trainer.

Frame Reynolds 631 air-hardened chromoly main tubes with heat treated-taper gauge cromo stays. Carbon fiber blades with canti brake bosses. Fork Wheels Ritchey Aero Comp wheelset. Maxxis Mimo CX, 32C. Tires Drivetrain Shimano 105 10-speed derailleurs, 105 STI levers, TruVativ Elita Compact crankset with Giga-X BB. Cockpit Ritchey BioMax II Road bar, Ritchey Comp V2 stem, Ritchey Comp V2 seat post, Fizik Pave saddle. Brakeset Avid Shorty 4 STI-compatible cantilevers, with in-line adjustors and 105 drop levers.

### **AURORA**

The Aurora is a classic loaded touring bike, kitted out with rack- and fender braze-ons, grippy cantilever brakes with dual levers that provide an additional braking position at the handlebar tops. A slightly taller head tube provides a more upright riding position that eases back and neck strain on long days. Burly 28mm tires roll smoothly, and better resist pinch flats—a boon when riding with a full load. Its stable handling manners make the Aurora one of the easiest-to-ride drop-handlebar road bikes going, so it's a great bike for long, leisurely paced rides even if you never decide to chuck it all and ride across the country (but isn't it nice to know you could?).

Frame	Reynolds 520 double-butted chromoly
	main tubes, double tapered cromo stays.
Fork	Chromoly unicrown, with canti bosses
	& low rider braze-ons.
Wheels	Alex ACE19 eyeletted rims,
	Shimano Sora hubs, stainless steel spokes.
Tires	Hutchinson Flash, 28C.
Drivetrain	Shimano Deore rear derailleur,
	Tiagra STI levers, TruVativ IsoFlow Road triple
	crankset with PowerSpline BB.
Cockpit	Ritchey BioMax II bar, Ritchey Pro adjustable
	stem, Ritchey Road seat post, Jamis saddle.
Brakeset	Tektro forged alloy canti's with in-line adjustors
	and safety levers and Sora drop levers.

Sizes: 46, 49, 51, 53, 55, 57, 60cm Color: Original Nova Green/Gloss Black | Weight: 22.75 lbs.

AURORA

Sizes: 47, 50, 53, 55, 57, 59, 62cm Color: Copper/lvory | Weight: 26.25 lbs.

### **SPUTNIK**

They don't come any simpler than this stripped-to-the-gills fixed gear unit. The Sputnik hangs proper rear-facing track dropouts on a Reynolds 631 steel frame, with a flip-flop rear hub that lets you mount an additional sprocket so you can change gearing mid-ride. Use it as a track racer, or mount up a brake, quit your day job and join the bike messenger ranks. This isn't a bike for the faint of heart, but for absolute purity of purpose there's nothing more exquisitely beautiful, or special-bred, than this elemental speedster.

Frame	Reynolds 631 air-hardened chromoly main tubes with heat treated-taper gauge cromo stays.
Fork	Easton EC70 carbon fork
Wheels	Alex DA22 rims, Formula 32H rear flip-flop hub, stainless steel spokes.
Tires	Hutchinson Quartz, folding, 23C.
Drivetrain	Fixed gear single speed, TruVativ Touro 48t crankset.
Cockpit	Easton EA50 bars, EA50 stem, Easton Road seat post, Fizik Pave saddle.
Brakeset	N/A

### FULL SUSPENSION MOUNTAIN BIKES

No gimmicks, no gadgets, zero compromise. That's always been our approach to bike design, and you won't see a better example of this philosophy than our 2006 full-suspension lineup.

Other companies seem to change suspension designs and configurations every year, in an attempt to become the next "in" thing. We've taken the opposite approach, sticking with good, performance-oriented designs that we've carefully honed, year after year, until they're razor sharp and ultra refined. We've been at this game a long time, and it shows in the way our bikes perform. It also means when we launch a new design, it's gotta be something big.

Big is the only way to describe the new Diablo series mountain bikes. The Diablo is about big hits, big air, and big travel. It's a drop-into-anything, ride-over-everything bike for downhill bombers and all-mountain adventurers. The Diablo's aluminum frame is burly, welded from oversize aluminum and shored up to take as much punishment as you can dish out. And its multi-link rear suspension gives you a healthy 175 mm nearly seven inches!—of rear wheel travel that's plush and controlled, as good at absorbing hits as it is at firmly planting the meaty Maxxis High Roller tires to keep you in control.

Our Dakar series continues as our most versatile, refined full-suspender. The Dakar XLT's 125mm-travel, multiple-linkage suspension gives you go-anywhere capability, while the more tautly strung Dakar XC's 90mmtravel configuration and superb pedaling efficiency make it the weapon of choice for cross-country racing. And then there's the Dakar and Dakar Sport, trail-wise, time-tested steeds that give you cross-country pedaling efficiency and refined, terrain-taming suspension performance, all at a very affordable price.

Full-suspension gives you the real-world benefit of better traction and control, whether you're flying downhill, scrambling for uphill traction or simply trying to cover a lot of trail before sundown. And with a full spread of dual-suspension bikes, there's a Jamis that's a perfect match for the way you ride today, and will help elevate your skills to make you a better rider tomorrow.

### DIABLO 2.0

It's a big world, and this is the bike for riding the biggest parts of it. The all-new Diablo's seriously oversized aluminum frame is overbuilt from head to toe, with a 1.5" head tube, 83mm bottom bracket, and a 150 x 12mm rear thru-axle swing arm swinging through 175mm—a whopping 7 inches—of terraintaming travel. Manitou's new titanium spring Revox shock keeps things well under control in back, following the lead of the new Manitou Travis Single Intrinsic fork as it works through its 180mm of travel. If you can bottom this out, you're coming down from space shuttle altitudes.

- Frame Diablo multi-link design, 1.5 head tube, 150mm x 12mm thru axle, 83mm BB shell, Manitou Revox shock, 175mm travel.
- Fork Manitou Single Intrinsic, 34mm stanchions, Intrinsic damping, 20mm hex axle, 180mm travel.
- Wheels Mavic EX823 UST Disc rims, Syncros Factory disc hubs, WTB spokes.
- Tires Maxxis High Roller tubeless 2.7" front, 2.5" rear.
- Drivetrain SRAM XO rear derailleur, XO Impulse trigger shifters, TruVativ Holzfeller Rock G 36/26 crankset with ISIS BB.
- Cockpit TruVativ Holzfeller 7050 riser bar, Holzfeller stem, Titec El Norte Pyro-Scoper seatpost, WTB Power V Race DH saddle.
- Brakeset Hayes El Camino hydraulic disc brakes with 8" V-cut rotors.

DIABLO 1.0

Same hard-working, overbuilt aluminum chassis as the Diablo 2.0, but decked out with Manitou's Swinger 4-way coil shock and the Manitou Stance Blunt fork for 175mm of rear travel and 170mm up front. Maxxis 2.7" front and 2.5" rear High Rollers provide total traction, with a bulletproof SRAM X-7 rear derailleur and matching X-7 triggers calling the gear changes, and a TruVativ Hussefelt 36/24 crank for motive power. Big, powerful Hayes HFX-9HD discs with 8" rotors puts you in control on smoking descents. If you can't roll over it with this, you'll want wings. Or a tank.

XXXW

Frame	Diablo multi-link design, 1.5 head tube, 150mm x 12mm thru axle, 83mm BB shell,
	Manitou Swinger 4-way coil, 175mm travel.
Fork	Manitou Stance Blunt, 32mm stanchions, FFD damping, 20mm hex axle, 170mm travel.
Wheels	WTB Dual Duty Freeride with eyelets, WTB Laser Disc hubs, WTB spokes.
Tires	Maxxis High Roller 2.7" front, 2.5" rear.
Drivetrain	SRAM X-7 rear derailleur, X-7 Impulse trigger shifters, TruVativ Hussefelt 36/24 crankset with ISIS BB.
Cockpit	TruVativ riserbar bar, Holzfeller stem, Titec El Norte Pyro-Scoper seatpost, WTB Power V Comp saddle.
Brakeset	Hayes HFX-9HD hydraulic disc brakes with 8" V-cut rotors.

### DAKAR XLT 3.0

The XLT is the all-mountain, 125mm travel version of our Dakar frameFrameplatform, and the 3.0 is the top of the heap. With suspension control in the rear byForkFox's lightweight RP3 shock with Jamis-optioned AVA (air volume adjust) canister, andWheelsin the front by the new, inertia valve-equipped (you don't activate it, only the groundTiresdoes), 130mm-travel Fox X fork. Mavic's CrossMax XL Disc wheelset combines aDrivetrairwide range of air volume pressurization with tough-but-lightweight durability. ShimanoCockpitXTR derailleurs and XT Rapidfire-SL shifters provide cross-country credibility, withBrakesetHayes El Camino hydraulics on 7-inch front and 6-inch rear V-cut rotors for downhillthe XLT 3.0 should be your bike.

- *Frame* Dakar multiple linkage design, Kinesium main frame, Fox RP3 AVA shock, 125mm travel.
- Fork Fox X Trail Tune with inertia valve, rebound adjustment & threshold blowoff, 130mm travel
- Wheels Mavic CrossMax XL Disc wheelset.
- Tires Hutchinson Spider, UST tubeless, 2.30".
- Drivetrain Shimano XTR rear derailleurs, Deore XT Rapidfire-SL shifters, Deore XT crankset with external bearing.
- Cockpit TruVativ Team riser bar, Team stem, and Team seatpost, Fizik Plateau saddle
- Brakeset Hayes El Camino hydraulic disc brakes with 7" V-cut front & 6" V-cut rear rotors.

### DAKAR XLT 2.0

Manitou's advanced Swinger Air SPV 4-way gives the XLT 5 inches of plush travel that's immune from pedal-bob. With a Manitou Minute 2:00 fork you can use the TPC Lockout and Rapid Travel Wind Down to go from 130 to 100mm of travel for serious climbing and XC work, without giving up big-hit capability. Deore XT derail-leurs and Deore Rapidfire-SL shifters make gear-picking easy, with a TruVativ FireX SL crank to get your power to the ground via Hutchinson Spider 2.30" rubber. Almost all the XLT 3.0's potential, at a more accessible price.

### DAKAR XLT 1.0

If you want big-hit ability without the complexity of multi-adjustable suspension this is your dream. The Fox Float R shock and matching Float R fork keep things smooth and manageable without the hassle of tricky setup. SRAM's X-7 27-speed drivetrain and a TruVativ FireX SX crank give you the go-power, and Hayes HFX-9XC hydraulics give you the stopping power that make the most of Hutchinson's grippy Spider treads. With Shimano M475 disc hubs and WTB Speed Disc rims this is a capable package you can upgrade later, or keep stock-simple and ride it hard straight out of the crate.

### DAKAR XC PRO

When we hang the "Pro" moniker on a bike, we mean it. The Dakar XC Pro is ready to go—all you need is a number plate. Same award-winning Kinesium main frame with carbon seaststays and bell crank as in '05, but with a completely revamped chainstay swingarm and 1-piece BB shell/BB pivot unit for the ultimate in precision suspension travel. With 90mm of travel from the Fox Float RP3 shock and 100mm from the Fox FX Terra Logic fork, the tubeless tires stay firmly planted for more climbing traction and faster cornering. SRAM's new, lightweight XO triggers tickle a matching XO derailleur for snap-it-off gear changes. With Avid's Juicy 7 hydraulic stoppers and TruVativ Team carbon crank, riser bar,and seatpost this is a true, ready-to-race factory rocket.

Frame	Dakar multiple linkage design,
	Kinesium main frame, Carbon seatstays,

	TruVativ Stylo Team Carbon crankset with Giga-X BB.
Cockpit	TruVativ Team Carbon riserbar, Team stem,
	and Team Carbon seatpost, Fizik Gobi saddle.
Brakeset	Avid Juicy 7 hydraulic disc brakes
	with 6" polygon rotors.

### DAKAR XC EXPERT

The XC Expert is the perfect racer for the real-world privateer. The frame and newly spec'd Fox Float RP3 shock is the spitting image of the XC Pro's. Fox's F100RL suspension fork provides season-long reliability, with the tuneability and lock-out capability to accommodate your riding style and terrain. You get the durability of Shimano's Rapidfire SL shifters and the click-shift performance of a Deore XT rear derailleur. Avid's Juicy 5 hydraulic calipers grip 6-inch polygon rotors for all-conditions braking performance, and Mavic's XM317 disc rims keep wheel weight (and attendant power-sapping inertia) to a minimum. Sling a leg over the saddle, and hit the start line.

Frame Dakar multiple linkage design, Kinesium main frame, Carbon seatstays, Fox FLOAT RP3 shock 90mm travel. Fork Fox F100RL with lockout, 100mm travel. Wheels Mavic XM317 disc rims, Shimano Deore disc hubs, WTB spokes. Tires Hutchinson Bulldog Airlight, folding, 2.1 Drivetrain Shimano Deore XT derailleurs, XT Raoidfire SL shifters. TruVativ Stvlo Team crankset with Giga-X BB. Cockpit TruVativ XR Riser Bar, XR stem, and XR seatpost, Fizik Gobi saddle. Brakeset Juicy 5 hydraulic disc brakes with 6" polygon rotors.

### DAKAR XC COMP

There's no better value in raceable, full-suspension cross-country. The same frame design as our higher-end Dakar XCs with aluminum seatstays and bell crank. The Fox Float R shock and Manitou's new R7 Comp fork (think light like a SID, but with much more stiffness and control), combine to make the Comp as maintenance-free as you can get with a race-worthy XC dualie. A SRAM X-9 drivetrain and shifters give it serious, click-into-gear performance that's bolstered by the stiff, oversize Giga-X Pipe bottom bracket and Juicy 5 hydraulic binders that will more than keep up with future, titanium-hardware upgrades.

	clamp seatpost, WTB Pure V Race saddle.
Brakeset	Juicy 5 hydraulic disc brakes
	with 6" polygon rotors.

Sizes: 13", 15", 17", 19", 21" Color: Ano Black/Ano Silver | Weight: 29.25 lbs.

### DAKAR SPORT

This is Dakar performance, stripped to its essentials but still backed by name-brand componentry where it counts. A capable Fox Float shock and Manitou Splice Super fork with 100-130mm of adjustable travel are the foundation for a component package that includes Avid's powerful BB5 cable-actuated disc brakes and a Shimano drivetrain that includes a Deore LX rear derailleur and Deore Rapidfire-SL shifters. The newly spec'd TruVativ FireX external-bearing supported crankset beefs up the drivetrain stiffness while WTB's lightweight Speed Disc rims and Formula hubs make the Sport accelerate and handle like a big ticket racer, without the steep price tag.

Dakar multiple linkage design, 7005 aluminum Frame Fox FLOAT shock, 90mm travel. Manitou Splice Super, 100 - 130mm RTWD adjustable travel. Wheels WTB Speed Disc eyeletted rims, Formula disc hubs, stainless steel spokes. Hutchison Scorpion, 2.00" Drivetrain Shimano Deore LX rear derailleur, Deore Rapidfire-SL shifters. TruVativ FireX LR crankset with Giga-X BB. Cockpit Alloy riser bar, alloy threadless stem, alloy micro-adjust seatpost, WTB Laser V Comp saddle. Brakeset Avid BB5 cable actuated disc brakes

DAKAR

& Avid FR-5 levers.

Fork

Tires

Simplicity and reliability are what you get with our first Dakar, which combines top-drawer suspension design with entry-level accessibility. Every aspect of its components mix-from the Shimano geartrain and TruVativ IsoFlow crank to the WTB Speed Disc rims and Tektro Aquilla ball-bearing disc brakeswas selected for honest performance and upgradeable compatibility. Like all Dakars, the precise placement of four main pivots, size-specific seatstay lengths, and a unified bell crank, optimizes suspension activity and lateral rigidity without pivot slop. So you get responsive handling, positive trail feel and reliable, durable performance.

Color: Ano Red/Ano Black | Weight: 32.75 lbs.

### HARDTAIL MOUNTAIN BIKES

The pure, elemental nature of a hardtail only makes it seem simple. In truth, designing a quality hardtail is seriously challenging. Without the technological crutch of suspension to fall back on it takes a lot of small, careful details to make one sing, while the smallest missteps are cruelly amplified—a truism that applies equally to hardtail riding and engineering.

We've always been known for our hardtails, in part because they're the perfect mirror for our no-frills, all-performance philosophy, but largely because we have the most relentlessly tweaked, refined, engineered-witha-fine-tooth-comb geometry. A Jamis hardtail starts out with a properly fitted, proportionately sized cockpit so it simply fits, guaranteeing comfort, efficiency and locating that all-important center of gravity in the sweet spot, splitting that fine hair that separates perfect handling, climbing traction and descending stability.

Our steering geometry is spot on, with a crisp feel and just the right feedback to give sensitively attuned riders just what they need to sense when they're on that perfect edge where the tires have the most cornering bite. Short chainstays promote climbing efficiency over the steep stuff with good power delivery on the flats and downhills, while a generous wheelbase contributes to handling stability and a smooth, flowing ride.

For racing hardcores, the big news is the Deore XT-equipped Dragon Pro. It's built around the same supple-riding steel frame as the Dragon Team, with Reynolds 853 air-hardened steel main tubes and the taut, perfectly dialed geometry we're famous for.

Serious, even occasional, racers will love the new Dakota Elite and Dakota Comp, with rigidly efficient aluminum frames and vibration-damping carbon seatstays that are one of the smartest refinements ever incorporated into a hardtail chassis. And for dedicated trail riders, there's the aluminum Durango and steel Exile series (including the exciting Exile factory singlespeed).

The Komodo continues as the king of big-hit hardtails, with long-travel forks, bomber rims and crank—all the heavy-duty parts you'd find on a freeride dualie, but without the complexity and added maintenance of rear suspension.

Riding a hardtail makes a statement. It says you value skill over technology, that you're willing to earn your speed and thrills through hard work and finesse. It's less BS, more bang for the buck. Riding a Jamis hardtail says all that, plus it lets them know you're not one to settle for second best.

### **DRAGON TEAM**

Steel is still the best foundation for a hardtail, and there's nothing better than Reynolds 853. The air-hardened, heat-treated chrome-moly main tubes give the Team the high-strung feel of a thoroughbred, with the torsional strength to resist big-gear standing climbs and keep the chassis flowing through high-speed bends and G-outs. Rage through the gears, using SRAM's hot new XO shifters and derailleurs, and marvel at the lightweight wow-factor of the carbon crank, seatpost and handlebar. With a lockout-equipped Fox F80RLT fork with blowoff threshold, Hutchinson Python tubeless rubber and Avid Juicy 7 hydraulic discs, this is a pro-level dream machine for the dual-suspended adverse.

- Reynolds 853 air-hardened/heat-treated cromo main tubes.
- Fork Fox F80RLT, with lock-out & blowoff threshold, 80mm travel.
- Wheels Mavic CrossMax Disc SL UST wheelset.
- Tires Hutchinson NG Python, tubeless, 2.0".
- Drivetrain SRAM XO rear derailleur, XO Impulse trigger shifters, TruVativ Stylo Team Carbon crankset with Giga-X BB.
- TruVativ Team Carbon flatbar, Team stem, and Team Carbon seatpost, Fizik Gobi saddle. Cockpit
- Brakeset Avid Juicy 7 hydraulic disc brakes with 6" polygon rotors.

### Frame

You asked for a more affordable version of the Dragon Team, and with the Dragon Pro. It may be a junior sibling, but it's not secon means. Same air-hardened Reynolds 853 steel frame, but we s and complexity by spec'ing Fox's lightweight F80RL fork and giv threshold. Lightweight Mavic XM317 disc rims and Hutchinson stock give aggressive traction without a lot of power-robbing ma the reliability of a Rapid-Fire shifting Shimano XT drivetrain, Trul and control center and Avid's Juicy 5 hydraulic stoppers; all mak a serious race junkie's #1 choice

### DAKOTA ELITE

The Dakota Elite's new-for-'06 chassis takes a page from the road bike design manual, combining Kinesis Superlight triple-butted aluminum with carbon seatstays for stand-on-the-pedals stiffness and a supple ride that would be impossible to duplicate with an all-aluminum frame. We dress it up with Shimano XT derailleurs and shifters, Juicy 5 hydraulics and Manitou's slick new R7 Super fork with TPC lockout and 100mm of bump-eating travel. Backed by an XT drivetrain and TruVativ's external-bearing Fire-X SL crankset for sure, secure shifting performance. Call it a flyweight trail bike, or a rough-and-tumble XC racer-it's true either way.

- Frame Kinesis Superlight 7005 triple butted aluminum main tubes, carbon seatstays.
- Fork Manitou R7 Super with TPC lockout, 100mm travel.
- Wheels WTB Speed Disc Pro eyeletted rims, Shimano M475 disc hubs, WTB spokes.
- Tires Hutchinson Bulldog Airlight, 2.1".
- Drivetrain Shimano XT derailleurs, Deore XT Rapidfire shifters, TruVativ FireX SL crankset with Giga-X BB.
- TruVativ XR flatbar, XR stem, and XR seatpost, WTB Pure V Race saddle. Cockpit
- Brakeset Juicy 5 hydraulic disc brakes with 6" Wavy rotors.

DAKOTA COMP

The Dakota Comp takes the Elite's brand-spankin' new aluminum/carbon frame, and pairs it with the kind of smart components mix that made us famous. Name-brand parts like the new Hayes Sole hydraulic discs, TruVativ control center and crank, Shimano Deore drivetrain and WTB rims with Hutchinson Scorpions let us cut price without cutting corners, delivering lightweight heft with hardcore performance. This is the fast way to get your feet wet in cross-country racing or serious trail riding, and if it turns into a serious passion, the no-apologies frame and a few smart upgrades will turn this into an elite-level racer.

JAMIS

Frame	Kinesis Superlight 7005 triple butted aluminum main tubes, carbon seatstays.

Brakeset	Hayes Sole hydraulic disc brakes with 6" V-cut rotors.	

### EXILE XC

The Exile XC is proof that there's still room in this world for a classic steel hardtail. Reynolds 631 air-hardened steel and a Manitou Axle Platinum Air forkwith lockout!----and 80mm of travel provide float-over-stutters performance no aluminum hardtail can touch. Our superbly tuned geometry gives the Exile outstanding climbing traction, with just the right fore/aft weight distribution to showcase steel's suppleness and ability to corner right at the limit. If we made this any better, we'd be stepping on the tail of our own Dragon Team and Dragon Pro (yes, it's really that good).

- Frame Reynolds 631 air-hardened cromo main tubes.
- Fork Manitou Axle Platinum Air with lockout, 80mm travel.
- Wheels WTB Speed Disc eyeletted rims, Shimano M475 disc hubs, stainless steel spokes.
- Tires Hutchinson Bulldog Airlight, 2.1".
- Drivetrain SRAM X-9 rear derailleur, X-9 Impulse trigger shifters, TruVativ FireX-SX crankset with Giga-X BB.
- TruVativ XR XC riserbar, XR stem, and XR seatpost, WTB Speed V Comp saddle. Cockpit
- Brakeset Avid BB5 cable actuated disc brakes & Avid FR5 levers.

EXILE SINGLE-SPEED

We toe the start line in '06 with our first factory singlespeed. This is the ultimate in stripped-down speed with a Reynolds 631 air-hardened steel chassis that climbs and corners the way a factory-built racer should. Investment cast, track-style dropouts load from the rear, with a slotted disc tab for the Hayes Sole hydraulic caliper and a Manitou Axle Platinum Air fork with Click-It lockout to round out the package on this one-sprocket rocket. Got a split personality? Dress it with slicks and it's a bad-butt city stomper. This is 100-percent serious performance, zero-percent BS.

Sizes: 13", 15", 17", 19", 21" Color: Radium Blue/Ano Silver | Weight: 28.75 lbs.

### KOMODO 3.0

The Komodo's triple-gauge, double-gusseted aluminum chassis and Manitou Stance Flow fork with Hex-Lock thru-axle say it all—this is a big-hit hardtail that, in the right hands, can match a long-travel dual-suspender blow for blow. This is super-duty stuff, from the 120-150mm adjustable-travel fork to the 8" rotors and Hayes HFX-9 hydraulic calipers. TruVativ's bomber Hussefelt bar, crank and Howitzer ISIS bottom bracket will hold up under hard landings, backed by the anti-taco protection of WTB's Dual Duty FreeRide disc rims and the added cushion of 2.35" Maxxis HansVenture tires. This is all about sticking the big landing and coming back for more.

- *Frame* 7005 triple gauge, double gusseted aluminum main tubes with double-D braced stays.
- Fork Manitou Stance Flow, with hex-lock thru axle, 120 150mm RTWD adjustable travel.
- Wheels
   WTB Dual Duty FreeRide eyeleted disc rims, Shimano M475 disc rear/Formula thru-axle front, WTB spokes.

   Tires
   Hutchinson Spider, 2.3".
- Drivetrain Shimano Deore rear derailleur, Deore RapidFire shifters, TruVativ Hussefelt crankset with Howitzer ISIS BB.
- Cockpit TruVativ Hussefelt 31.8mm riser bar & stem, XR seatpost, WTB Power V Comp saddle.
- Brakeset Hayes HFX-9 hydraulic brakes, 8" V-cut rotors.

### KOMODO 2.0

A 130mm-travel SR Duro D fork preserves most of the Komodo 3.0's big-hit capability, but cuts maintenance and setup headaches by about 70 percent. Hayes Sole hydraulic disc brakes, a TruVativ control center, Ruktion crank and Howitzer bottom bracket provide cost-effective toughness, while a Shimano drivetrain gives you enough gearing to take some of the slog out of uphills. Whether your playground obstacles come from Mother Nature or the hard urban reality of loading docks and staircases, the FX 2.0 is up to the challenge.

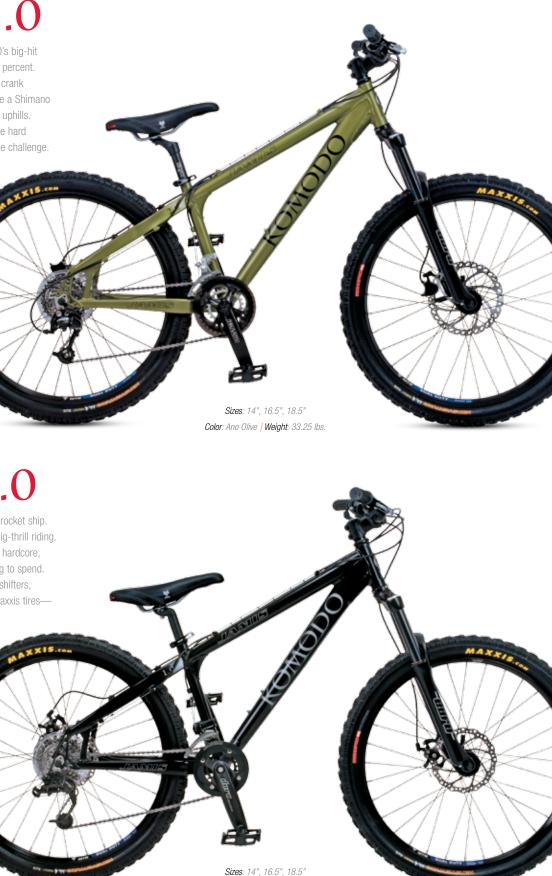

Frame 7005 triple gauge, double gusseted aluminum main tubes with double-D braced stays. SR Duro D, 130mm travel. Fork WTB Dual Duty FreeRide eyeletted disc rims, Wheels Formula disc hubs, stainless steel spokes. Tires Hutchinson Spider, 2.3". Drivetrain Shimano Deore rear derailleur, Alivio RapidFire shifters, TruVativ Ruktion crankset with Howitzer ISIS BB. Cockpit TruVativ 31.8mm riser bar & alloy threadless stem, TruVativ XR seatpost, WTB Power V Comp saddle. Brakeset Hayes Sole hydraulic disc brakes with 8" V-Cut front & 7" V-cut rear rotors.

### KOMODO 1.0

If you prefer the dark side of the Force, the Komodo FX 1.0 is your rocket ship. This is the ultimate shortcut to the underground world of no-frills, big-thrill riding. Same fork and bombproof frame as the Komodo FX 2.0, but with a hardcore, no frills, parts mix that maximizes the money we know you're willing to spend. You get brand names where they count, like SRAM derailleurs and shifters, WTB Dual Duty FreeRide disc rims, Tektro disc brakes and 2.35" Maxxis tires so while the FX 1.0 may not cost you a bundle of folding bucks, it won't fold before you do.

7005 triple gauge, double gusseted aluminum Frame main tubes with double-D braced stays. Fork SR Duro D, 130mm travel. WTB Dual Duty FreeRide disc rims, Wheels Formula disc hubs, stainless steel spokes. Tires Hutchinson Spider, 2.3". Drivetrain SRAM SX-4 rear derailleur, SX-4 24-speed trigger shifters, SR Duro crankset with sealed cartridge BB. Cockpit Alloy 31.8mm riser bar & alloy threadless stem, alloy micro-adjust, WTB Power V Comp saddle. Brakeset Tektro lo disc brakes with 7" wavy rotors.

Sizes: 14", 16.5", 18.5" Color: Ano Copper | Weight: 33.75 lbs.

Sizes: 14", 16.5", 18.5" Color: Ano Black | Weight: 32.75 lbs.

### DURANGO 3.0

With a 27-speed Shimano drivetrain and Hayes hydraulic disc brakes, the Durango 3.0 is aggressively well-equipped. Gusseted 7005 aluminum tubing, S-bend stays and a replaceable derailleur hanger are high-end frame features that ensure strength, without the bone-jarring ride harshness of a cheap aluminum chassis. The Manitou Axel Platinum fork provides 100mm of smooth suspension action, with lockout, taking the sting out of harsh trails and helping maintain control by maximizing the bite of the Hutchinson Scorpion tires. From the Giga-X Pipe external-bearing bottom bracket to the sleek FireX crank and Deore rear derailleur, this bike offers race-level performance on a sport-level budget.

- *Frame* 7005 aluminum main tubes, gusseted, with S-bend stays, replaceable derailleur hanger.
- Fork Manitou Axel Platinum Lockout, 80mm travel.
- Wheels WTB Speed Disc eyeletted rims, Formula disc hubs, stainless steel spokes.
- Tires Hutchinson Scorpion, 2.00"
- Drivetrain Shimano Deore rear derailleur, Deore Rapidfire-SL shifters, TruVativ FireX LR crankset with Giga-X BB.
- Cockpit Alloy riser bar, alloy threadless stem, alloy micro-adjust seatpost, WTB Speed V Sport saddle.
- Brakeset Hayes Sole hydraulic disc brakes with 6" Wavy rotors.

### DURANGO 2.0

Mechanical disc brakes alleviate some complexity and cost, preserving almost all of the Durango 3.0's abilities while paring the cost down considerably. A SRAM 27-speed drivetrain provides finger-quick gear changes, while the same frame, wheels and tires from the up-level Durango 3.0 give the 2.0 hardcore durability. Take it on the trail and you'll feel the difference a properly set-up frame makes, with your weight centered for climbing traction and steer-with-a-thought handling precision. It's priced like a casual bike, but it's backed by serious Jamis performance.

### DURANGO 1.0

Tektro mechanical disc brakes and 24-speed Shimano gearing give the Durango 1.0 a solid performance footing and plenty of potential for skills growth, but at a price that lets you hit the trail without stripping your finances. Same ultra-refined Jamis geometry and frame as the rest of the Durango line, and the handling manners that go with them. Identical wheels and tires with the Durango 3.0 give you plenty of traction over challenging terrain, so you can ride with confidence and make the most of the Durango's impeccable climbing and handling.

### JAMI5 Frame 7005 aluminum main tubes, gusseted, with S-bend stays, replaceable derailleur hanger. SR XCM, external preload 80mm travel. Fork WTB Speed Disc eyeletted rims, Wheels Formula disc hubs, stainless steel spokes. Tires Hutchinson Scorpion, 2.00". Drivetrain Shimano New Alivio rear derailleur, Acera 24-speed shifters, TruVativ Isoflow crankset & sealed cartridge BB. Cockpit Alloy riser bar, alloy threadless stem, alloy micro-adjust seatpost, WTB Speed V Sport saddle Brakeset Tektro lo disc brakes with 6" Wavy rotors, Shimano Acera levers.

IAMI

Sizes: 12", 14", 15.5", 17", 19", 21" Color: Ano Silver/ Ano Black | Weight: 31.75 lbs.

### CROSS COUNTRY 2.0

With 27 gears to choose from, and SRAM X-7 shifters calling the shots, the Cross Country 2.0 provides you with easier climbing so you can better enjoy its dialed-in descending manners. S-bend stays and a replaceable derailleur hanger mark this as a serious trail bike, with stable handling and quick response, something you'll notice from the very first pedal stroke.

Sizes: 12", 14", 15.5", 17", 19", 21" Color: Ano Olive/Ano Silver | Weight: 31.25 lbs.

### CROSS COUNTRY 1.0

Same easy-to-maneuver manners of the Cross Country 2.0, but with a more price-conscious parts mix. A reliable Shimano drivetrain gives you 24 speeds to choose from, with a sealed cartridge bottom bracket and double wall rims for reliable and durable performance. A full range of six sizes ensures proper bike fit for optimized handling, climbing traction and downhill cornering.

Color: Ano Deep Red/Ano Silver | Weight: 31.75 lbs.

### RANGER **SX**

Tapered aluminum main tubes put extra material where you need the strength, while keeping the overall structure light and responsive. And a replaceable derailleur hanger ensures your investment in lightweight aluminum is money well spent. SRAM trigger shifters make quick work out of selecting each of the 24 gears, with a low-maintenance 50mm-travel fork and direct-pull brakes emphasizing comfort and control.

### RANGER XR

The Ranger XR features trail-worthy performance, with a quality aluminum frame that's suspension fork-ready so you can easily upgrade from the rigid fork. But in the meantime, you can enjoy the lighter front end. The Ranger's simplicity and adjustability (thanks to the adjustable rise stem) makes it ideal for exploring fire roads and tackling light trails comfortably, with a broad gearing range that provides climbing power for even steep terrain. Sling some slicks on it and it becomes a dual-purpose speedster, capable of hashing it out on the asphalt the way it tackles trails when shod with knobbies-it's like getting two bikes at once!

### JAMIS Ano Black Frame Enduro frame design, 7005 aluminum main tubes, replaceable derailleur hanger Fork Hi-Tensile steel unicrown, semi-forged dropouts with eyelets Alloy 26 x 1.5", Formula QR hubs, Wheels nickel plated spokes. ### STREET& SPORT COMFORT

Riding on the street should be about "smooth". It should be about the hiss of tires as they gobble up pavement, the feel of the wind over your skin, the joy of cruising on what scientists and engineers acknowledge to be the most efficient transportation device yet devised by man—the bicycle.

Our street performance and sport comfort bikes are built for exactly that: performance and comfort, on the street. They're bikes, slightly detuned from their "pure" road or mountain bike brethren, and tamed for life in the big city. Upright handlebars give you that tall, see-over-traffic perspective and a riding posture that's easy on your back. Suspension seatposts (and, on many models, matching suspension forks) dull the thump of potholes and pavement cracks, while smooth-rolling high-pressure tires move you down the road in near-silent efficiency.

Some of the other guys repurpose their mountain bikes with thin tires and cheap forks, calling them city bikes. But snaking through the asphalt jungle at speed demands a different kind of handling precision than what you need for picking your way down a wooded trail. We do, however, borrow liberally from the mountain bike parts kit for drivetrain components and brakes, for their reliability and quick-stop performance. And there's a lot to be said for the ruggedness of mountain bike-inspired frame tubing, especially when it's combined with proper road-going geometry.

The new Coda series is our speed-oriented line, topped by the Coda Supreme—possibly the sleekest, most exotic flat-bar road machine to hit the bike path. A breathtakingly gorgeous Reynolds 853 steel/carbon chassis (suspiciously like our Eclipse road frame) gives it a lot of visual show, but with the Shimano 105 drivetrain it has the go-power to back up its speedy good looks.

The Tangier, Aragon, Citizen and Commuter add progressively more utilitarian comfort to the mix, with suspension forks and seatposts for that smooth glide, and angle-adjustable handlebar stems and plush saddles for comfort.

For rugged dependability you can't beat the Explorer series, with friendly, easy-to-ride handling manners, generously padded saddles and mountain bike styling that make them perfect for lunchtime snack runs or weekend hops with the kids.

There's a bright world of fun and fitness just waiting for you, and it starts with your own driveway. Throw a leg over a Jamis street performance or sport comfort bike, and get a taste. We think you'll be back for more.

### CODA SUPREME

This is a serious flat-handlebar road bike, possibly the finest ever. If you've been disillusioned by dumbed-down mountain bikes masquerading as road bikes, the Coda Supreme is the answer. With the same Reynolds 853 steel-with-carbon construction as our lustworthy Eclipse frame, the Coda Supreme has steel's plush, sensitive ride, but with less weight. Shimano's new 10-speed 105 drivetrain, a TruVativ Elita Compact crankset and Giga-X oversize bottom bracket enhance power efficiency while providing a broad gearing range that makes quick work of hills, with puncture-resistant tires and a lightweight Mavic wheelset. This is race-quality, without the scrunched-down racing position (or attitude).

- Frame Carbon fiber top tube, seat tube & seatstays with Reynolds 853 down tube and heat-treated cromo chainstays.
- Fork Easton EC70 carbon fork.
- Wheels Mavic Aksium wheelset.
- Tires Hutchinson Top Speed with Stop Puncture casing, 25C.
- Drivetrain Shimano 105 10-speed rear derailleur, R770 flat bar shifters, TruVativ Elita Compact crankset with Giga-X BB.
- Ritchey Comp bar, Ritchey Pro angle-adjustable stem, suspension seat post, Fizik Pave saddle. Cockpit
- Brakeset Tektro 521AG alloy calipers and Avid FR5 levers.

### CODA ELITE

New for 2006: Knobby tires, for the added versatility of adventuring and light-snow commuting. Still featuring the steel frame, and Avid's BB7 cable-actuated disc brakes and a light touch at the brake levers that extends comf The Giga-X bottom bracket's additional stiffness makes itself felt in improved out-of-the-saddle climbing performance, and a little less chainring rub for a quieter ride under full steam.

Drivetrain	Shimano Deore XT rear derailleur, R660 flat-bar shiftlevers, TruVativ Elita triple crankset with Giga-X BB.
Cockpit	Ritchey Comp bar, Ritchey Pro angle-adjustable stem, suspension seat post, Fizik Pave saddle.
Brakeset	Avid BB7 cable actuated disc brakes & Avid FR-5 levers.

### CODA COMP

It might have a mountain bike silhouette, but the skinny tires, lightweight Shimano R500 wheels and fast-rolling Hutchinson rubber mark it as a purebred road bike. The angle-adjustable stem permits a more-upright, see-over-traffic posture, while the suspension seatpost and Jamis Street saddle help reduce the strain on your neck and back. Like the Coda Elite, the Comp benefits from the added efficiency of TruVativ's Giga-X bottom bracket for that slight edge in efficiency.

Frame Reynolds 520 double-butted chromoly main tubes, double tapered cromo stays. Fork Carbon fiber blades with brake bosses. Wheels Shimano R500 wheelset Tires Hutchinson Flash, 28C Drivetrain Shimano Deore XT rear derailleur. R440 flat-bar shiftlevers, TruVativ Touro triple crankset with PowerSpline BB. Cockpit Ritchey Comp bar, Ritchey Pro angle-adjustable stem, suspension seat post, Jamis Street saddle. Brakeset Avid Single Digit 3 direct pull brakes & Avid FR-5 levers.

### CODA **SPORT**

With its Reynolds 520 double-butted steel frame, broad-range triple-chainring gearing and friendly price, the Coda Sport has become one of our most popular bikes. The friendly riding posture, sensibly practical—yet speedy—parts mix and clean-but-understated graphics make it an ideal city bike. Use it for breakfast runs, lunchtime errands or urban commuting, and you'll turn inner city transit into stress-relieving fun.

Frame Reynolds 520 double-butted chromoly main tubes, double tapered cromo stays. Chromoly unicrown with low rider braze-ons. Fork Wheels Alex ACE18 eyeletted rims, Shimano 2200 32H road hubs, stainless steel spokes. Hutchinson Flash, 28C. Tires Drivetrain Deore rear derailleur, R440 flat-bar shifters, TruVativ IsoFlow Road triple crankset with sealed cartridge BB. Cockpit Ritchey flat bar, Ritchey Pro angle-adjustable stem, suspension seat post, Jamis Street saddle. Brakeset Tektro self-centering alloy linear pull brakes with Tektro alloy levers.

Color: Chromium/Gloss Black | Weight: 25.00 lbs.

Color: Radium Blue/Gloss Black | Weight: 25.50 lbs.

### CODA

Our customers keep asking for a more affordable version of the Coda Sport, hoping to turn their spouses and friends on to the practical fun of city riding. So we made a new model, aggressively priced and with a smaller chainring combination for more climbing power. It feels lighter and more responsive than a mountain bike, because it is. Stable handling and an easy-to-use control layout makes this a natural for people who are rediscovering the joy of cycling.

### TANGIER

A perennial favorite, with a lightweight aluminum frame and an angleadjustable handlebar stem that helps you achieve a comfortable riding position. Easy-to-use X-7 trigger shifters put gear selection at your literal fingertips, with smooth-rolling puncture-resistant tires and a modest suspension fork and seatpost to enhance road-going comfort for your wrists, neck and back.

- Frame 6061 TIG-welded aluminum, sloping double triangle frame design, replaceable derailleur hanger.
- Fork SR NCX-D suspension, external preload adjustor, 63mm travel.
- Wheels Alex X2100 double wall rims, Shimano RM40 hubs, stainless steel spokes.
- CST inverted "lockjaw" tread with puncture Tires resistant casing, 38c.
- Drivetrain SRAM SX-5 rear derailleur, X-7 27-speed trigger shifters, TruVativ IsoFlow crankset with guard & sealed cartridge BB.
- Cockpit Hi-rise comfort bar, adjustable-rise alloy stem, suspension seatpost, Jamis Comfort saddle.
- Brakeset Tektro alloy direct pull brakes with power modulator, Tektro Tenera comfort levers.

### ARAGON

A high-rise handlebar, center-groove saddle, suspension seatpost and fork make the Aragon one of the most comfortable urban bikes available. A full 24-speed drivetrain and puncture-resistant tires keep things moving easily and smoothly-even uphill. There's even a pant guard smartly designed into the crankset, to keep you looking good as you cruise the city in style.

	Radium Blue/ Platinum

	with guard & sealed cartridge BB.
Cockpit	Hi-rise comfort bar, adjustable-rise alloy stem,
	suspension seatpost, Jamis Comfort saddle.
Brakeset	Tektro alloy direct pull brakes with power modulato
	Shimano Acera alloy levers.

### CITIZEN

A sleek saddle with center groove, 21-speed drivetrain and lightweight alloy rims make the Citizen more comfortable and easier to pedal than most similarly priced bikes. And a full run of seven sizes helps ensure you'll achieve a comfortable, pedaling-efficient position with the help of an angle-adjustable handlebar stem to keep you in control.

### COMMUTER

It's called the Commuter, but it's also ideally suited for lunchtime errands and dodging that nasty hunt-for-parking problem during the lunch hour. A lightweight aluminum frame and matching alloy wheels give the Commuter an edge when it comes to energy efficiency and corrosion resistance, and like the rest of our sport comfort lineup the angle-adjustable stem helps assure you of a comfortable riding position and efficient pedaling.

	Gloss Black
Frame	6061 TIG-welded aluminum, sloping double triangle

	comfort levers.

### EXPLORER 4.0

Disc brakes give the Explorer lightweight control feel at the brake lever, for more safety and additional comfort and control. Superior braking performance in wet conditions, with more durability than traditional rim brakes, make the Explorer 4.0 a great choice for wet-weather towns and occasional riders. The Jamis Comfort saddle, suspension seatpost and tall handlebar give you a comfortable, see-overtraffic riding position that's kind to your neck and back.

- 6061 TIG-welded aluminum, sloping double triangle frame design, replaceable derailleur hanger. Frame
- Fork SR XCM suspension, external preload adjustor, 80mm travel.
- Weinmann ZAC19 double wall rims, Formula disc hubs, stainless steel spokes. Wheels
- Tires Jamis Sport Comfort with puncture resistant casing, 1.95".
- Drivetrain Shimano New Alivio, New Alivio Rapidfire shifters, TruVativ IsoFlow crankset with guard & PowerSpline
- Hi-rise comfort bar, adjustable-rise alloy stem, suspension seatpost, Jamis Comfort saddle. Cockpit

Brakeset Tektro IO disc brakes, Tektro Tenera comfort levers.

### EXPLORER **3.0**

Like the Explorer 4.0, a lightweight aluminum chassis slots the Explorer 3.0 in a cut above similarly priced bikes, giving you more speed for less effort. With a dependable, quick-shifting Shimano drivetrain the Explorer 3.0 is great for short errands, and a perfect way to extend your mid-week gym workout by making the gym commute part of your fitness program.

### Ano Black/ Ano Orange Frame 6061 TIG-welded aluminum, sloping double triangle frame design, replaceable derailleur hanger. SR XCM suspension, external preload adjustor, Fork 80mm travel. Brakeset Tektro alloy direct pull brakes with Tektro Tenera comfort levers.

### EXPLORER 2.0

The Explorer 2.0 proves you can build an exciting-looking town bike that truly delivers on its promise of fun. An integrated pant guard, wide, cushy saddle and suspension fork and seatpost make it a natural for short errands near the office, with puncture-resistant tires and a smooth-shifting Shimano drivetrain.

### EXPLORER 1.0

It doesn't get much simpler than this. Our entry-level Explorer's lightweight aluminum chassis and 21-speed drivetrain make it a superb in-town speedster and fitness bike almost anyone can afford. And because it's not a one-size-fits-all bike like those department store specials you know it will fit you properly, with the correct weight distribution for more comfort, better handling and safety.

	with Tektro Tenera comfort levers.

### JAMIS CRUISERS

There's something about a cruiser's timeless styling that just makes people smile. Maybe it's that newsboy look, or the confident whoosh of those big balloon tires. Or maybe it's because cruisers remind us how much fun riding can be.

A Jamis cruiser is an up-to-the-minute refresh of the timeless cruiser. Lightweight aluminum frames and modern, almost zero-maintenance components make our cruisers lighter, easier to pedal and faster than their historical forebears.

You'll feel right at home perched on our plush cruiser saddles. Your hands fall naturally onto the soft grips of the wide handlebar, and with the first turn of the pedals you're free. Our wide-contact cruiser tires offer a big, smooth-rolling footprint for stability and cornering confidence, and a magic carpet ride that positively sings as though every road were new asphalt.

We offer back-to-basics single-speeds, three- and seven-speeders that combine pedaling ease with minimal complexity, and your choice of simple hand brakes or no-frills coaster brakes. And every Jamis cruiser features that upright, see-all-around perspective and comfortable riding position that helps you spot things you'd never notice looking through a windshield.

It's a fact—every neighborhood looks better from a cruiser saddle. Take a cruise through your own neighborhood on a Jamis, and you'll see things in a brighter, more golden light. It's a feel-good machine for your body and your soul.

### EARTH CRUISER 3

Swoopy, classic styling meets modern comfort in the Earth Cruiser 3. The EC3 has an almost effortless ride, thanks to its lightweight aluminum frame and nearly maintenance-free Shimano Nexus 3-speed hub. Our refined, elastomer-sprung saddle is a step up from squeaky steel springs with a no-slip, synthetic suede top cover and smooth, thigh-gliding sides. Add soft-to-the-touch kraton grips and smooth-rolling, broad-contact tires and you've got the ultimate bicycle for casually cruising sidewalk cafe's.

Mens: 18.5", 21.5" Ladies: 15.5", 17.5"

31.50 lbs. Weight

Sizes

Copper/ Ivory (M)

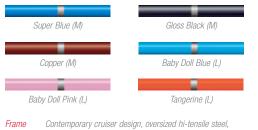

One ride on this stylish cruiser and you can't help but grin. The EC1 features an aluminum frame that makes the bike light and easy to pedal. With one single gear and simple Shimano coaster brake, this bike is a cinch to start and stop. Our handlebars sweep comfortably wide and back (but not too far!) for a casual upright ride position. Classy Jamis details like an alloy crank, synthetic suede covered saddle, even silver chain, set you and this easy rider apart.

### EARTH CRUISER 2

Don't be fooled by the Earth Cruiser 2's timeless glossy finish and simple character-this is a modern-day cruiser. The EC2's cantilevered lines and painted chainguard may recall classic cruisers, but our 21st century frame design, straight-bladed unicrown fork, elastomer-sprung saddle and wide-contact tires make it lighter and more comfortable to ride than any old-school single-speeder.

- with chainguard and alloy kickstand. Fork Oversized steel unicrown with ovalized blades,

- Brakeset Shimano rear coaster brake.

The Boss blends mountain bike practicality and cruiser sensibility into a uniquely comfortable city bike and weekend cruiser. While most cruisers make do with just one or two sizes, the Boss comes in six sizes for a perfect fit—essential for comfort. A no-fuss 7-speed drivetrain with twist shifter makes it fast. The plush Cheeks saddle, adjustable-rise stem and upright riding position let you avoid neck and back strain, cruising in comfort on the wide, smooth-rolling whitewall tires.

### **BOSS CRUISER**

The Boss Cruiser Coaster offers single-speed cruiser simplicity, but comes in six perfect-fit sizes for more comfort and pedaling ease. The lightweight frame and robust, nearly zero-maintenance components make this Boss as carefree as a bicycle gets. Our ultra-plsh Cheeks saddle, wide handlebar and upright seating position give you a safe and secure see-over-traffic view, and lets you revel in the simple joy of near-silent pedaling.

### TAXI

We build this bike comfortably tough to stand up to the rigors of the resort world. Which is why Taxi is the number one choice for seaside rental fleets all along the Atlantic coast and Gulf shore. With it's lightweight aluminum frame, salt-water resistant drivetrain and wheels, thorn proof tubes, and puncture resistant vinyl saddle, Taxi is perfect for the casual rider looking for a low maintenance, throw-it-around single speed.

### JAMIS YOUTH

If we're passionate about our other bikes, we're positively obsessive when it comes to kids' bikes. For adults, cycling is second nature. But we often forget the frustration and scraped knees of our first rides. Learning to ride a bike is hard—but it's quickly overshadowed by that first taste of freedom earned from those initial, wobbling pedal strokes. That's why we obsess over our youth bikes—we want to make cycling easy for kids, and our hand-wringing over the details can make such a huge difference to them.

We use proportionately sized parts—small grips for small hands, short cranks for growing legs and properly sized saddles, because proper bike fit is the foundation of proper control. And that translates to confidence and smiles. We design low stand-over frames that make getting on and dismounting easy, with stable handling that inspires confidence and improves safety.

Most of our kids' bikes feature lightweight aluminum frames, which may seem like an unnecessarily costly step, but when you think about it -- nobody benefits from a lightweight bike more than a child cyclist. A pound is nothing to an adult, but for a 48-pound kid, a couple extra pounds are a lot. Besides, our tough aluminum chassis will be around for years, perfect for hand-me-downs.

Kids will love the fun, eye-catching graphics, but more importantly, they'll appreciate how easy our bikes are to ride. And while the colorful decor might not be to your taste, you will like the fully padded saddles, the fenders, the full-wrap chainguards and quality construction.

Those first rides they take without training wheels or you holding them up are something they'll remember forever. It's their first taste of wheeled mobility. And it's the perfect metaphor for childhood—you run alongside until they can go it alone, turn them loose and watch them go. Give them a good start. Stack the deck in their favor, with a Jamis.

### FESTER 2.4

A durable-but-lightweight aluminum frame forms the foundation for the Fester 2.4, a bike that delivers big-boy performance with big-hit looks. We've given the Fester some advanced features, but worked at keeping it easy to ride with simple, 14-speed gearing actuated by twist shifters; powerful, safe direct-pull brakes with proportionately sized levers; and light alloy rims that help reduce pedaling effort. A replaceable derailleur hanger makes the frame more crash-resistant, and a chainring bash guard adds a tough look and safety all at once.

	ESTER Ano White
Frame	7005 TIG-welded aluminum, tapered/oval
	top & down tubes, with replaceable derailleur hange
Fork	SR M3000, suspension, 40mm travel.
Wheels	Black anodized alloy 24 x 1.5" rims
	with QR front & rear hubs, nickel plated spokes.
Tires	CST ATB knobbies, 1.95".
Drivetrain	Shimano Tourney TX30 rear derailleur,
	SRAM 14-speed GripShift, alloy 32/22 crankset
	with outer rock ring.
Cockpit	Alloy direct pull brakes and levers.
Brakeset	Riser bar, threadless alloy "shorty" stem,
	micro-adjust alloy seatpost, Jamis Jump saddle.

### FESTER 2.0

Just like the 2.4 version, a lightweight aluminum frame and alloy rims make the Fester 2.0 easier to pedal, which adds to the fun factor and encourages longer riding sessions. A real suspension fork emulates the look of our adult-size Komodo bikes, but it's fully functional for more comfort and additional control. A simple twist shifter activates the 6-speed drivetrain, letting your youngster ride at a comfortable pedaling pace, whether uphill or down. As always, we use proportionally sized saddles, grips and brake levers for maximum comfort, control and safety.

Frame	7005 TIG-welded aluminum, tapered/oval top
	& down tubes, oversized stays.
Fork	SR M2000, suspension, 30mm travel.
Wheels	Black anodized alloy 20" x 1.5" rims,
	black front & rear hubs
	with nutted axles, nickel plated spokes.
Tires	CST ATB knobbies, 2.0", blackwall.
Drivetrain	Shimano TX-30 rear derailleur,
	SRAM 6-speed GripShift,
	alloy crank with double-sided chainguard.
ockpit	Riser bar, adjustable rise alloy stem,
	micro-adjust alloy seatpost, Jamis Jump saddle.
Brakeset	Alloy direct pull brakes and levers.

### CAPRI 2.4

An all-new aluminum frame with swooping lines not only looks good, but offers the added safety of lots of stand-over clearance for easier mounts and dismounts and less potential contact if she takes a spill. A full-length chainguard and fenders keep dirt off her clothes, and the wide, smooth-rolling 2.125" tires add more ride cushion and enhance stability as she works the twist shifter through its range of seven click-selected gears. Lightweight, durable aluminum for the frame and rims reduces pedaling effort and keeps the fun factor high.

### capri Snearmint Frame 7005 TIG-welded aluminum, new comfort frame design, with fenders and alloy kickstand. Hi-tensile carbon steel unicrown. Fork Wheels Black anodized alloy rims 24 x 1.5", black front & rear hubs with nutted axles, nickel plated spokes. Tires Brooklyn Speedway Street, 2.125", black with white stripe. Drivetrain Shimano TX30 rear derailleur, SRAM 7-speed Grip Shift, alloy single ring crankset with chainguard. Cockpit Angle adjustable alloy stem, comfort-type riser bar, clamp, synthetic suede comfort saddle with elastomer springs

Brakeset Alloy direct pull brakes and levers.

### CAPRI 2.0

A scaled down version of the Capri 2.4's frame, with aluminum construction that makes it one of the lightest 20-inch-wheeled girls bikes available, for less pedaling effort and more fun. A wide, fully padded saddle and an angle-adjustable handlebar stem improve comfort and help her refine and sharpen her bike handling as she works the twist-shifter gear selector.

Frame	7005 TIG-welded aluminum, new comfort frame
	design, with fenders and alloy kickstand.

	alloy single ring crank, with chainguard.
Cockpit	Angle-adjustable alloy stem, comfort type riser bar,
	synthetic suede comfort saddle with elastomer springs.
Brakeset	Alloy direct pull brakes and levers.
Sizes	10" Frame x 20" Wheels

### LASER 2.0

Laser's cruiser-inspired frame features time-honored BMX geometry (unlike so many other fanciful frames with almost unrideable handling), a sleek new two-tone graphics package and big, cushy Brooklyn Speedway tires with a slick new, full wrap chainguard. It's packed with the looks kids like, but with sensible features like lightweight aluminum wheels and frame, for less pedaling effort and hand-me-down durability.

### FESTER

Golden Rod/ Pearl White

- Frame 7005 TIG-welded aluminum, MX Cruiser frame design, with kickstand.
- Fork
   Hi-tensile carbon steel unicrown, tubular blades, leading dropout.

   Wheels
   Black anodized alloy 20 x 1.75" rims, ball bearing 'ed front & KT coaster brake rear hubs, nickel plated spokes.
- Tires Brooklyn Speedway, 2.125", black.
- Drivetrain
   Cold forged 1-pc crank with windmill chainring, 36 x 18T gearing, with chainguard.

   Cockpit
   Alloy MX stem, BMX bars 150 x 580mm,
- safety bell, and Jr. BMX padded saddle with protective clear coat.
- Brakeset KT rear coaster brake.

### LASER 1.6

A scaled-down version of the Laser 2.0, only rendered in steel and kitted out with removable training wheels for added stability while he's learning to ride. Famous Jamis quality details abound, like a full alloy stem and black electro-plated rims and crank for in-the-weather rust resistance. It's equipped with an easy-to-use coaster brake just like the Laser 2.0, so as he moves up he'll already know how to stop safely.

Frame New MX Cruiser frame design, MX Hi-Ten tubing, with extra-wide training wheels. Hi-tensile carbon steel unicrown, tubular blade. Fork leading dropout. Wheels Electro-plated black 16" rims, ball bearing'ed front & KT coaster brake rear hubs, nickel-plated spokes Tires Brooklyn Speedway Jr.Street, 2.125", black. Drivetrain Cold forged 1-pc crank with windmill chainring, 36 x 18T gearing, with chainguard. Cockpit Alloy MX stem, BMX bars 140 x 560mm width, safety bell, and Jr. BMX padded saddle with protective clear coat. Radium Blue/ Pearl White 8" Frame x 16" Wheels Sizes Brakeset KT rear coaster brake Weight 27.00 lbs.

Weight

25.00 lbs.

### STARLITE 2.0

A graceful, swooping frame of lightweight aluminum looks sweet, especially with the color-matched chainguard and fenders. The swept-back handlebars aren't just for looks; they position her hands in a comfortable position below her chest, so she's not reaching awkwardly upward to try and take control. The white-walled Brooklyn Speedway tires are smooth rolling, with a sensible black tread (those all-white girl tires don't look so good after they've been ridden a few times) and simple-to-use coaster brake.

# Pearl White Frame 7005 TIG-welded aluminum, new comfort frame design, with fenders and kickstand. Fork Hi-tensile carbon steel unicrown. Wheels Black anodized alloy 20 x 1.75" rims, ball bearing'ed front & KT coaster brake rear hubs, nickel plated spokes. Tires Brooklyn Speedway, 2.125", black with whitewalls. Drivetrain Cold forged 1-pc crank with windmill chainring, 36 x 18T gearing, with full wrap chainguard. Cockpit Alloy stem, low-rise comfort bars, safety bell, synthetic suede padded saddle with springs. Brakeset KT rear coaster brake.

### MISS DAISY 1.6

A downsized version of the Starlite's swoopy frame, in economical steel, with training wheels for more stability and a faster transition to two-wheel fun. In true Jamis no-nonsense style, there are no frilly streamers to get tangled up and look frayed a couple months down the road (she'll never miss them). But there are good-looking painted fenders and a full wrap chainguard to protect your little Miss Daisy from chain grease and puddle-splashes.

Frame	New comfort frame design, with fenders, kickstand
	and extra wide training wheels.
Fork	Hi-tensile carbon steel unicrown.
Nheels	Electro-plated black 16" rims, ball bearing'ed
	front & KT coaster brake rear hubs,
	nickel plated spokes.
Tires	Junior Street, 2.125", black with whitewalls.
Drivetrain	Cold forged 1-pc crank with windmill chainring,
	36 x 18T gearing, with full wrap chainguard.
Cockpit	Alloy MX stem, low-rise comfort bars, safety bell,
	synthetic suede padded saddle with springs.

### HOT ROD 1.2

Boys love the new checkered-flag graphics and knobby-tread tires with matching saddle artwork, fenders and color-matched chainguard. Full ball-bearing construction throughout keeps the Hot Rod rolling and steering longer, easier, and more safely than department store imitations. The V-Shape (he'll have a V-8 soon enough) frame design offers plenty of stand-over clearance for fast pit stop mounts and dismounts.

Frame Low stand-over safety-style frame design, MX Hi-Ten tubing, with extra-wide training wheels and fenders. Fork Hi-tensile carbon steel unicrown, tubular blade, leading dropout. Wheels Electro-plated black 12" rims, ball bearing'ed front & KT coaster brake rear hubs, nickel plated spokes. CST Street, 2.125", all black. Tires Drivetrain Cold forged 1-pc crank with 5-arm chainring, 28 x 16T gearing, with chainguard. Cockpit Alloy stem, mid-rise bars with comfort sweep, safety pad and bell, Jr. BMX padded saddle with protective clear coat. Brakeset KT rear coaster brake.

### LADYBUG 1.2

Lady Bug shares the Hot Rod's easy-to-step-over frame design, but with graphics and colors little girls can't resist. The fully padded and sprung saddle, slip-resistant pedals, and small diameter grips make it a cinch to ride, with fenders and a fullwrap chainguard to add a little dirt and stain protection. And the safety bell is there to ring along with the smiles.

Frame	Low stand-over Y-style frame design,
	MX Hi-Ten tubing, with extra-wide training wheels
	and fenders.
Fork	Hi-tensile carbon steel unicrown.
Wheels	Electro-plated black 12" rims, ball bearing'ed
	front & KT coaster brake rear hubs,
	nickel plated spokes.
Tires	CST Street, 2.125", black with whitewall.
Drivetrain	Cold forged 1-pc crank with 5-arm chainring,
	28 x 16T gearing, with chainguard.
Cockpit	Alloy stem, mid-rise bars with comfort sweep,
	safety pad and bell, Lil' Girls comfort saddle
	with protective clear coat.
Brakeset	KT rear coaster brake.

### 2006 JAMIS GEOMETRY

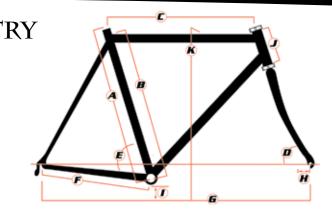

All Jamis manufactured frames and forks feature a limited warranty against defects; and a one-year warranty on parts.

See your owner's manual for complete details.

All bicycles are equipped with full CSPC equipment.

All specifications are subject to change without notice.
